Contents Releases Category:Sega Game GearOne solution that doesn't involve a degree or a time commitment would be to use a regex. 0 The pattern will be similar to this example - (?:.+(?=.,))+ - except that it will stop matching when the character class is found: (?P[\w-]+).+$ Then you will use the String.matches method to test each string against the pattern. The.+ is greedy, so it will attempt to match as much text as possible. The quantifier (?) is used to prevent backtracking. A.* will also work, but.+ has better support for lookaheads and lookbehinds. If the first character after the first occurrence of the pattern will always match the character class, you could probably make the pattern more succinct. If the string is always ending with a space, you could use (?Fluid power tools can be used to drive a fastener into a work piece. The fastener, such as a nail, is typically advanced into the work piece by a tool bit that is mounted within a fluid-powered driver. The work piece can be a wood structure, such as a deck board or subflooring, a drywall board or sheeting, a wood wall, or a metal stud or plate. It is known to use thermoplastic fasteners as anchors for steel structures, such as buildings, walls, floors, and bridges. The use of thermoplastic fasteners for steel structures is described in U.S. Pat. Nos. 6,176,346, 6,536,832, 6,431,251, 6
