Normally when you double-click the trackpad it causes the Finder to run a specific file. I can't remember the command and I was wondering how this works. I can't find it listed in the Apple keyboard shortcuts preference and I haven't been able to locate it in launch control. A: Looked a bit more into the problem and found it had to do with going to the trash, it seems that that is where the issue came from. I'm not sure if it is a bug on the Apple side but dragging a document out of the trash would allow the Finder to run the command.
