With Keyframe Animation you can animate your keyframes in a few clicks. With a simple point and click you can draw an eye, lips, a nose and a mouth for your character. You can combine the drawing tools into one group or separate them into different groups. You can activate/deactivate the drawing tools (eye, lips, nose and mouth) individually. You can also select one of the previously drawn keyframes and copy it to the clipboard or duplicate it. Creator: The Chalkboard 2D animation tool is a new creative tool that allows you to instantly create 2D animations with up to 4 objects and 32 keyframes in one key. Animation is something simple for artists but still can be time consuming. There are many ways to animate a 2D character in any program. With Chalkboard you can export your 2D animation to GIF, PNG, SVG, PDF, MP4, AVI, MOV, 3GP, WEBM, HTML5. You can also export the animation to QuickTime. You can animate the.swf file, the.fla file and even the layer in Flash. With the set up of the characters in Chalkboard you can either preview the animation by clicking the on screen mouse or show it on your desktop by clicking the export button.
