
View and customize screen themes Allows you to view and customize screen themes How to change and customize Metro UI Tweaker icon By default, the Windows Metro UI Tweaker app's icon is set to the generic Windows 8 folder icon. However, you can change it to your favorite or compatible icon using a simple right click to rename the app's icon. All you need to do is right-click on the app's icon and choose 'Properties' from the context menu. In the dialog box that will open, select the 'Customize and rename' option, and click 'OK'. You will now be able to change the app's icon. Metro UI Tweaker for Windows 8 The Metro UI Tweaker for Windows 8 is a simple, easy to use application. It has no options for settings and functions, but provides some great ways to customize your Windows 8. Unlike many other apps for the new Windows 8 OS, the Metro UI Tweaker for Windows 8 doesn't have any description or quick start guide. As a result, you may be confused when you start the application for the first time. There are no options available in the 'Settings' pane, but the app does offer a context menu that contains a few options for configuring the Metro UI Tweaker for Windows 8. Among the available options, the 'App Settings' option allows you to remove the tray icon, disable the shutdown, lock, and restart options in the Metro UI. However, to be able to access these options, a restart is required. The other two options, re-enable the Metro UI and restore power buttons, are also accessible from the 'Settings' pane. To use these options, you need to restart the system. Metro UI Tweaker for Windows 8 In addition to these options, the Metro UI Tweaker for Windows 8 can be used to easily add some other options and power buttons in the Metro UI. The 'Taskbar' option allows you to pin a new taskbar button in the Metro UI. The 'Task manager' option displays the task manager UI in the Metro UI, and the 'Lock Screen' option removes the lock screen when the system is locked. You can also remove the lock screen by unchecking the 'Lock Screen' option. These three options require a system restart. Metro UI Tweaker for Windows 8 If you feel the need to completely remove the Metro UI from Windows 8, the application can be used to easily remove all of the Metro UI components 45cee15e9a

===== Video recording macros for Windows that easily enable the user to quickly record a series of keystrokes that can be viewed later on in a special playlist. You can then add all the macros to a project or set of projects to instantly create a working solution that can be saved as a project and used later on.

KeyMACRO also features time based logging to capture the macros that were entered. KeyMACRO

Features: ===== - Record macros using hotkeys - Save macros to a playlist to re-record later

- Add macros to a project - Record macros and store them as playlists - Record macros at a specific time - Create playlists that can be used as templates - Schedule and repeat macros - Time based logging - Edit playlists in the editor and save projects - Export projects - Add macros to library - Import projects - Copy macros from projects - Create new macros from selected macros - View the full keyboard layout -

Hotkeys: Alt + 1, Alt + 2, etc. - Options menu: Change logging settings, check box to auto-repeat macros, capture settings, etc. - Main window: Macro input area, playback area, playlist editor, and menu bar -

Playlist editor: Playlist editor with a list of available macros, tools for adding and removing macros, etc. - File menu: Add macro, export project, import project, etc. - Project menu: Save project, add project to playlist, export project, import project, and create a new project. - Help menu: Get Help, About, etc. - Library menu: Options, Backup, Import, Export, Save and Reset, and Delete. - Options menu: Save macros at specific time, macro re-recording time, macro repeat frequency, etc. Macro definition and recording: ===== To record macros the way you want to, you first must define the macros and then record them. The process of defining a macro can be customized to your taste as follows: 1. Select "Record macros" from the Macro menu. 2. Enter the name of the macro, define whether to record on the keyboard or the mouse and define a button to trigger recording. 3. Define what keys the macro should be activated by from the "Keys" sub-menu. In addition, if a hotkey is selected, then you can specify whether to assign the macro to a single key
