Teacher's Guide (English Language Use), 2011. Mastermind Use Of English Language Teacher's.epub.Q: Creating image with size equals to image size with PictureDrawer I have a problem in creating image that has exact size of the actual image. The goal is to create image in the size of the actual image and with transparency. This is the code I am using: Bitmap bmp = Bitmap.FromFile("C:\\Users\\User\\Desktop\\Test.jpg"); using (PictureDrawer pd = new PictureDrawer()) { pd.DrawImage(bmp, new Rectangle(0, 0, bmp.Width, (int)imageWidth), new Rectangle(0, 0, (int)imageWidth, (int)imageWidth)); Bitmap bmp\_trans = pd.Flatten(bmp); bmp\_trans.Save("C:\\Users\\User\\Desktop\\Test.jpg", ImageFormat.Png); } It works but the size of the created image is not the same as the actual image. I am trying to create 50% transparency (I know that PictureDrawer is not the best option to achieve it, but it is for the purpose of this question). Any help? A: Here is a more effective
