It was a work of love, but my real intention was never to attract any attention to myself, or my efforts. More than anything, I wanted to write a calculator that worked. Its bigger goal was to be a tool for those who were unable to understand the conversion charts on the packaging of most calculators. You just put the numbers in and it will always work. It was actually quite successful, and had a few thousand users in the first few years, before I gave it up, and went back to school. Fast forward to 2008, when I decided to take a break from school and started working on an app called MediaCalc. MediaCalc was designed to be a replacement for the separate media player that many users were using. In it, a single media key would control everything. Like its predecessor, the MediaCalc serial key, motocalc serial number, motocalc serial number, motocalc serial number, motocalc serial number generator, motocalc serial number generator, Motocalc Serial 8. It was a great idea at first, but a bug in the code in the process made it impossible to make calculations with fractional values. This was the main reason I gave up on it, and went back to school, but I missed the mark on the media side of things, so I turned my focus to music. Motocalc was my first big project, and by the time it was finally released in the App Store, I had built a community of 100,000. Its even been downloaded over a million times, and though I never officially declared it open source, it is now completely free. This is not to say it was easy to get to this point, or that I have stopped working on it. The following year, I re-designed the app using the Windows 8 style, and relaunched it as Motocalc Serial. The only
