Q: jQuery - \$(this) not working I'm building this selector as an object with variables. Any idea why this isn't working? jsFiddle here. HTML: jQuery: var \$selector = { bar: 'bar', foo: \$('foo'), baz: \$('baz') }; var \$bar = \$selector.foo.add('bar'); I get Uncaught TypeError: Cannot read property 'add' of undefined. Thanks, Jak A: The \$ at the beginning is getting in the way of the second statement which is just a function, you can get rid of it to make things work. var \$selector = { bar: function() { return \$('bar'); }, foo: \$('foo'), baz: \$('baz')}
