

---

If you would like to see a tutorial on ground operations with the GSX, click here: . \*\*flight simulator \*\*flight simulator x ... As we know, the GSX and GSX-P are currently in beta test mode, and as you can see from this site, the GSX-P now has support for 3DO / OMRON controllers. I have a design / development question in ground aviation, and I am not sure how the GSX works with the OMRON controller. I know that the GSX-P currently only supports Nestable. Is it possible to use an OMRON controller with the GSX-P? If so, how? Thank you. Regards. Jerry fffad4f19a
