## MensorGIS Crack + For Windows

MensorGIS is a handy and reliable application that provides you with surveying and cartography capabilities. MensorGIS can be used for learning the basics of cartography and creating maps. The included data model is based on simple lines, primitives points and areas. You can use MensorGIS for thematic mapping, executing queries and more. It comes with advanced measurement functions, which will help you perform detailed topological analysis. Features: ... Overview MensorGIS is a handy and reliable application that provides you with surveying and cartography capabilities. MensorGIS can be used for learning the basics of cartography and creating maps. The included data model is based on simple lines, primitives points and areas. You can use MensorGIS for thematic mapping, executing queries and more. It comes with advanced measurement functions, which will help you perform detailed topological analysis. Features: Create a basic geometric map or a complex geometric model: either 3D (heightmap, 3D model or any other 3D geometric model you like) or 2D (line, polyline, polygon, point). Use the powerful geoalgorithms: based on the very well-known GIS algorithms, a vast selection of them that you can easily apply on your model. You can also use the built-in QGIS algorithms. Built-in functions for measuring: length, area, perimeter, centroid, central point and more! Built-in functions for georeference: in order to make the model compatible with most GIS, you just need to add the X and Y coordinates of the model and they will be immediately displayed in the attribute table. Built-in functions for thematic mapping and data analysis. Display attributes table: you can visualize any attribute on the map. It can be any spatial or non-spatial data. Create an interactive map using the Google Maps API: you can add images, lines, polygons, and more on your map directly from your database, making it more customizable. The images can be animated and you can easily define the options of the map using the Google Maps API. Other additional features that you can use in MensorGIS: Markers: you can add multiple markers in a map by simply adding their coordinates. Overlays: you can add any type of graphic, text or

### What's New in the?

MensorGIS is a handy and reliable application that provides you with surveying and cartography capabilities. MensorGIS can be used for learning the basics of cartography and creating maps. The included data model is based on simple lines, primitives points and areas. You can use MensorGIS for thematic mapping, executing queries and more. It comes with advanced measurement functions, which will help you perform detailed topological analysis. Screenshots: This tutorial will help you to install MensorGIS and get started with it. Tutorial: Step 1: We start with step by step instructions on how to install and use MensorGIS. Start your MensorGIS installation by clicking on MensorGIS.exe in your Desktop. You will be prompted with the MensorGIS user interface. Accept the license terms and click on Install. Note: You can select the language that you want to use during installation. Step 2: MensorGIS starts downloading its initial data. A notification box will appear on your desktop with a status bar stating the progress of the installation. When the installation is completed, you will be prompted to close MensorGIS and exit your PC. Step 3: MensorGIS is now ready to be used. The application will start and MensorGIS will open. You can start MensorGIS by clicking on the Start icon. MensorGIS comes with its own simple data model, which consists of Primitives such as lines, points and areas. Note: Any data that is linked to other applications will be downloaded along with MensorGIS. You can always download MensorGIS along with any data, which it was linked to. Step 4:

---

MensorGIS is designed in such a way that it provides a simple and intuitive user interface. The UI consists of three main tabs: Map, Report, and Data. You can switch between these tabs by clicking on their respective icons. MensorGIS has a focus on comprehensibility. The interface is simple to use and navigation is relatively easy. MensorGIS can be used for creating maps and reporting. We will see how to create a map later in the tutorial. Let's start with the MensorGIS Map Tab. In the Map Tab, you will see a number of panes, which contain the features that are being displayed in the map. These features can be dragged around the map for rotation, zooming in and out. To add features to the map, you will need to click on the Map icon. The Map icon will be displayed at the top-left corner of the map. When you drag the Map icon around the map
