What's New In PicBackMan?

Manage your photos and videos with ease Includes options to move or delete duplicates Scan for duplicate items Automate picture and clip migration Key features: Backup your pictures and videos to various social media and online storage services Backup to one or more locations (ie. PicBackMan Server, Internet, Amazon, USB, Windows or NAS)

The service is fully functional for free Automated backup without any recurring costs Manage your photos and videos with ease The application is designed to be extremely easy to use. Image management and transfer It is possible to transfer your photos and videos from one storage service to another, such as a photo sharing network or online photo album. User friendly interface It has a clean and modern interface, where the main tabs are intuitive and simple to use. Automatically sync your online storage This feature allows you to store your data in one location. This makes it easy to access or transfer them to other servers, without having to deal with the messiness of connecting to the Internet and downloading them, which can become quite difficult. Automate picture and clip migration This feature allows you to automatically move photos and videos from one account to another. Access to multiple accounts This tool is compatible with most online storage, social media and online photo album sites, such as Flickr, Google Photos, Smugmug, OneDrive, Dropbox, Photobucket, Facebook, Box, Instagram, YouTube, Foursquare or your Amazon server. The service is fully functional for free Automated backup without any recurring costs Manage your photos and videos with ease The application offers a very user friendly interface. Scan for duplicate items This feature allows you to delete duplicate images and videos, moving them to a specific folder instead. Learn more: [PicBackMan](#) Download The Best E-Commerce App That Will Help You Sell More Facebook's new Instant Articles content mean the end for Web Design companies? How can you use this to your advantage? F... Facebook's new Instant Articles content mean the end for Web Design companies? How can you use this to your advantage? Facebook has announced a content-focused revamp to its Instant Articles news service. In the past, the social network has limited the amount of content that users can view on Facebook, and content has to be limited by publishers to only be read on the platform. Publishers include The New York Times, the Guardian, and BuzzFeed. Read more on [BigTechTimes](#): Facebook team working on its own News app.
