## Baixar Martin Mystery Dublado Completo Torrent

I have seen that the method was with a javascript function and this function return the value. But I want to know if I can start my script before the body with a javascript function. Here is my code: `function ReadText(e) { var texto = document.getElementById(e).value; setTimeout(function() { if (document.body.innerHTML) document.body.innerHTML = ""; try { var arr = new Array(texto); var txt = arr.join(""); document.getElementById(e).value = txt; } catch (e) { document.getElementById(e).value = ""; } }, 5000); }` My content of a tags is this: A: You can't run your script on body loading, you need to run your script at the beginning of your content. If your content is a json, you can use it in the onload method to run your script, like that: `const $ = new XMLHttpRequest(); $.open("GET","1.json"); $.onload = function() { if (this.status >= 200 && this.status`
