TrackChecker X64

* User-friendly interface * Almost all track services available * Track import/export, photos, and print * Easy to add tracks * Detailed tracking information * Reporting by sender, recipient, and other options This is the latest version of TrackChecker, which is not only available for PC, but also Mac OS X. You can also try TrackChecker for iPhone. TrackChecker website: Trackchecker is a reliable and user-friendly utility meant to help you monitor the course of your parcels or other packages sent by mail throughout the world. The application is particularly useful for those who shop online, and like to be kept aware of the track a specific parcel is on, where it has stopped, investigate a possible delay or quickly discover if it got lost. Similarly, if your business depends on your products getting delivered on time to their recipient, you might want to monitor the path of your numerous parcels and be able to alert your buyer when their product has reached their destination. This can also help you discover any ill-intended client, who places an order but refuses to pick up their parcel. Moreover, you can add events to your track, such as the shipment day, and start a countdown, enabling you to see how many days it takes until the package is delivered, specifically if it takes significantly longer than expected, which might mean you need to contact your courier service. This utility can monitor the tracks of your shipment on over 270 mail services, be it postal or couriers, from countries such as Russia, Ukraine, China, Korea, Israel, United Kingdom, Spain, Argentina, New Zealand, Cyprus, South Africa, India, Norway, France, Denmark, and many others. This allows you to oversee the path of your package virtually all over the world, and make sure it arrives at its destination. TrackChecker enables you to monitor numerous parcels at the same time, with the possibility of marking off or hiding those that have been delivered. The program can check all the tracks at startup, so you can quickly learn of any changes in your shipment's status. TrackChecker is a great tool, useful for anyone who needs to ship items via various delivery services, as it allows you to constantly monitor your parcels' status and be kept aware of its current location. TrackChecker Description: * User-friendly interface * Almost all track services available * Track import/export, photos,

What's New In TrackChecker?

Parcels tracking software by qwstart.com TrackChecker is a reliable and user-friendly utility meant to help you monitor the course of your parcels or other packages sent by mail throughout the world. The application is particularly useful for those who shop online, and like to be kept aware of the track a specific parcel is on, where it has stopped, investigate a possible delay or quickly discover if it got lost. Similarly, if your business depends on your products getting delivered on time to their recipient, you might want to monitor the path of your numerous parcels and be able to alert your buyer when their product has reached their destination. This can also help you discover any ill-intended client, who places an order but refuses to pick up their parcel. Moreover, you can add events to your track, such as the shipment day, and start a countdown, enabling you to see how many days it takes until the package is delivered, specifically if it takes significantly longer than expected, which might mean you need to contact your courier service. This utility can monitor the tracks of your shipment on over 270 mail services, be it postal or couriers, from countries such as Russia, Ukraine, China, Korea, Israel, United Kingdom, Spain, Argentina, New Zealand, Cyprus, South Africa, India, Norway, France, Denmark, and many others. This allows you to oversee the path of your package virtually all over the world, and make sure it arrives at its destination. TrackChecker enables you to monitor numerous parcels at the same time, with the possibility of marking off or hiding those that have been delivered. The program can check all the tracks at startup, so you can quickly learn of any changes in your shipment's status. Features: * Check the shipping status of over 270 services, such as USPS, FedEx, DHL, and UPS * Check the delivery address of the package * Compare it with the already-existing list of addresses * Update the tracking link immediately * Add custom tracking links * Check the status of your order or parcel (delivery completed, returned or lost) * Mark tracking link as delivered, even if you haven't seen the package yet * Change color scheme of the tracking link * Set the status of your delivery in the background * Add orders to your favorites * Get the tracking details of the parcel * Set a tracking alert * Perform online search for tracking information * Convert the tracking link into a QR code to be scanned on the go * Receive push notifications of your tracking link * Log the location of your package * Log the errors and processing results of the delivery * Assign a delivery time (or date) for your order * Integrates with the world's most popular shipping carriers (USPS, FedEx, UPS, DHL, TNT, etc.)

System Requirements For TrackChecker:

OS: Windows 7, Windows 8, Windows 10. Processor: Dual Core processor or equivalent. Memory: 2 GB RAM. Storage: 100 MB available space. Graphics: OpenGL 3.2 or above. Additional Notes: Please note that the multiplayer version does not support non-steam user accounts, the only way to play this game is with a steam account.
