Comment: I just downloaded the game via the xbox and was able to get into it but have run into multiple account issues. I created multiple accounts on the XBOX live and all works great but I keep getting the "other" account message when trying to login. Also I have tried to contact customer support and have been told the xbox live support team will contact me. However, that has not happened thus far. I have also contacted PlayStation customer support and they are trying to get a fix in place for their end. I am currently using the wrong account for this and would love some help so I can keep the game going. I have also tried to create a new account with the clear text password method and it says I can only login with the "Forgot" password, but I have had that password from the beginning as i have used it. Any help would be appreciated. This is the end in a way - the story is over and what's left is just.... we wait for the developers to reboot the game and fix these. It's depressing. I'm trying to learn Cucumber by using RSpec in this tutorial, I'm using FactoryGirl to generate my params. And in this tutorial, I'm using RSpec to generate my steps for cucumber. I can easily write in Cucumber format if I put the two together, but when I use FactoryGirl and RSpec to complete the two, both will show this error: undefined method `accepts' for Cucumber::Ast::Doc:Module (NoMethodError) 1: "Johnny" fill_in "Address1", :with => "1234 Main St." fill_in "City", :with => "New York" fill_in "State", :with => "NY" fill_in "Zip", :with => "10001" fill_in "Country", :with => "USA" fill_in "Phone", :with => "123-456-7890" fill_in "Email", :with => "johnny@doe.com" fill_in "Website", :with => "" fill_in "Company", :with => "No Company" fill_in "User Age", :with => "1" fill_in "User Gender", :with => "Male" fill_in "User Country", :with => "USA" fill_in "User State", 1cb139a0ed
