YourMoneyGuard is an affordable yet comprehensive financial software that features a clean UI, customizable options, and multi-functional calculators. Create accounts, transactions and events, set monthly limits and reminders, view statistics, generate reports and schedule backups to name a few of its features. Purpose-driven finance software, YourMoneyGuard aims to cover all your financial needs. It is designed as the portable counterpart of YourMoneyGuard, with some additional features. Hence, the program can also run on any PC that has a minimum operating system of Windows XP Service Pack 3 or later. It offers all the functionalities of the main version, and it comes with many extra functionalities that make it more convenient for users. It has a clean UI and intuitive navigation, plus some pre-configured settings, default currencies, and different editions, so you can use it to suit your needs. Additionally, it provides a custom print function that helps you obtain financial reports with rich information. Portability advantages Apart from .NET Framework, there is no other installation involved, which means that you can drop the program files to any part of the hard drive and just click it to run. There is also the possibility to save it to a pen drive or other removable storage unit, in order to launch it on any PC effortlessly. In addition, unlike most installers, this app doesn't add new entries to the Windows registry or create extra files on the HDD without your approval, thus leaving no traces behind after its removal. Get started by creating a doc At startup you are required to create a new document to store all financial data in, by specifying an output directory and file name (.ymg format). This file can be saved at any time and resumed to update its information. Plus, a sample file is supplied to help you get an idea of how the tool works. Create accounts, transactions and events So, you can add as many accounts to the database as you want, and fill in details when it comes to the account description, initial balance and date, along with any notes. After this step, it is possible to create transactions with a description, date, label (income or expense), category, subcategory, account, amount, notes, and reminders. Likewise, you can indicate important events to monitor. Set monthly limits and reminders, view statistics, generate reports It is possible to define categories and subcategories, mark recurring transactions, set monthly limits and reminders, use a search function with refined filters (e.

This program is a comprehensive finance management system designed to help you keep track of your income and expenses. It is portable so you can take it along with you and access it on any PC. It will also help you know how much you need to save for the future. Backup & Restore. Simple and convenient backup and restore feature that also helps you

Edit: Name changed due to it being illegal Purpose The purpose of this tool is to give you advice on what to eat for a balanced diet, how to get healthy and stay that way. A diet plan that you can follow every day of the week is available for you to choose from. Your choice will depend on your lifestyle, gender, activity, body size, age, and other factors. Also, you can adjust the program's settings such as restrictions and your daily/weekly personal goals. Your diet The diet that you choose is based on your physical activity levels, lifestyle and, in some cases, your age and gender. So, you can pick one from the available healthy diets listed for your current lifestyle. One example of a healthy diet for a sedentary lifestyle is the LEARN LEAN diet. Your daily goal You can set a personal goal for how many carbohydrates, proteins, fats, calories, sugars, and caffeine you want to consume per day. Choose one from our recommendations, fill in the fields with your personal information, and you're done. You can also adjust the program's settings and more... If you're having trouble with something, or are unsure about it, you can look it up in the program's appendix. These sections include a list of all the foods and their nutrition content, an illustration of the daily calories per food group, and a list of ways to burn calories. Calorie counter YourCALC is a calorie counter, i.e., a tool to count calories. Enter the calories you consumed and the amount of exercise you perform to stay or get fit. YourCALC will show you a daily graph depicting the current average calories per day, the maximum calories you can eat per day, the daily calorie range, and the monthly and annual average. Also, you can modify the program's settings and more... Proteins Proteins are the most important part of our diet and, besides carbohydrates, are the most important source of calories in our daily food intake. They provide energy, are essential for growth, reproduction, and building of the tissues of the body. Proteins also have an important role in maintaining the immune system. Fats In contrast to carbs and proteins, fats are rarely considered to be essential. They provide different types of energy, are involved in skin and hair growth, and in the maintenance of energy levels. Healthy

What's New In?
