Pipeline visualization is provided through, for example, Bentley's VisiOn 3D, which uses DirectX to provide the rendering. Some graphics hardware manufacturers support AutoCAD through open-source or closed-source drivers, such as Maxon Computer's CINEMA 4D, which is based on the CINEMA 4D engine. The French-based manufacturer of printing software PTC Creo supports AutoCAD as a plug-in. Some mathematics packages that interface with AutoCAD directly are: Maple, Mathematica, and Mathematica. Maple and Mathematica are also supported on Windows. Expert Systems Expert systems are a type of knowledge-based system that was developed in the late 1970s. In a well-designed expert system, the knowledge base provides the rules for the interpretation of the data and is used to answer questions from the user. This was achieved by taking the knowledge expressed in the user manual and using the knowledge base to "expertise" the system so that it can answer questions based on that knowledge. In the Autodesk AutoskAR, Autodesk developers can use an existing Autodesk Expert System or create one from scratch. They can also use their own programming skills to link their programs with an Autodesk Expert System. Programmers can use the Autodesk API to customize their programs. If the programmer is an Autodesk Employee, the Autodesk API can be used to get information about the user's account. The Autodesk Expert System's native programming language is AutoLisp. Since Autodesk first introduced the Autodesk AutoskAR, a new development language for Autodesk has been introduced called Autodesk-LightLisp. This programming language is a combination of the Autodesk LightLisp and Autodesk Developer tools. LightLisp is used to develop programs that are integrated with AutoLISP. Developer tools is used to program the Expert System. These tools can be used for creating, debugging, and validating the AutoLISP program. LightLisp allows the programmer to dynamically modify their AutoLISP program. The Autodesk's LightLisp development tools supports both 32-bit and 64-bit operating systems. Autodesk Expert System's Native Programming Language is Autodesk AutoLisp. Industries that use expert systems include medical, financial 5b5f913d15
