· Create cover sheets in a snap! Easy to use and very professional looking! · Very simple interface that allows you to create professional looking cover sheets in seconds! · Quick and easy to use, simply click once to print your cover sheets! · Export to PDF, Word or XPS files and use for professional looking sales flyers! StarFax CoverSheet Creator is a simple to use application that allows you to create cover sheets in a snap! Easy to use and very professional looking! It's also very simple to use, simply click once to print your cover sheets! This is a very nice program and it will make cover sheets which can be used in my opinion as an alternative to using an old fashioned typewriter for creating letters, documents, invoices and other important papers. You can use a printer or choose to print out with fax in several other ways. The available templates are varied and you can choose from several others by going to the templates option, however I didn't see a way to remove a template and add a different one to the list. As far as customization is concerned, you can only choose from a handful of preset templates that are pre-defined and offered by default with a little bit of tweaking. I have tried to create a cover sheet using a standard cover sheet template. I did not see a way to add fields as far as customization is concerned. What I would have liked to see included in this program would have been a feature for creating mail merge style letter, invoices, or any other kind of mailing. There is no way to do this in the available templates and you have to create them yourself. One last thing I wanted to mention was that this software had a problem when I was trying to connect to my printer using Windows XP Home edition and Windows Vista ultimate. There was a warning message saying "the system is not connected to the network" everytime I tried to print out the coversheets. I'm not sure what this problem is about but it made it impossible for me to use this application. I have to give this program a slight plus point for the ability to create cover sheets. The only downside is that I had problems connecting to a printer which I tried to use to print out the cover sheets. Did you find this helpful? Thanks for the feedback! What is Shareware?Shareware is software that is freely available to anyone who wishes to
