The tools you have at your disposal include text boxes, dates, hyperlinks, tables, graphs, and images that you can insert in the slides. The software is compatible with Windows 7, 8, 10 and all editions of Microsoft's software. For example, you can use keywords to search for pictures that are relevant to the content of the presentation. As mentioned earlier, you will need to have an Internet connection to get the pictures you want to use and you can either do it manually or use a third-party software to do the job for you. The good news is that it is relatively easy to install the add-in; all you need to do is click on the "Add" button that appears on the right-hand side of the screen and follow the instructions. When you do so, you will need to download the relevant PowerPoint application, which you can do by clicking on the "Download" button.
