How To's and Tutorials: 1. Installation: For manual install and support see this article. 2. Using: To get started click the "Download" button on the toolbar and download the.EXE file to a folder on your computer. Double-click the.EXE file to run the application. Donations: If you don't have time to support me - you can help by donating. Please use one of the following options. PayPal: Bittax: Telegram: Email: sasha423@mail.ru License: Q: Filtering data by a range in amCharts I am using amCharts to create a chart. In my Chart I am using a columnrange chart for performance benchmarking. I do not use the default filterControls(searchBox) but rather I use a Button that does a search based on a range(first and last date). The problem with the data that I have is that there are thousands of data points/rows. I need to filter the data by the value of an attribute in the row of the chart. This attribute in each row has a unique code(id). In my code I get all the data points based on the chosen range from the first date to the last date. The problem with this is that I need to filter the rows that have the same id and then order them by the value of the attribute that I mentioned. My code for generating the chart is below

```
chartData = []; var chartArray = []; var chart = AmCharts.makeChart("chartdiv", { "type": "serial", "theme": "light", "dataProvider": chartData, "valueAxes": [{ "position": "left", "maxValue": 10 }], "graph
```

#### What's New In Office Password Recovery Toolbox?

Office Password Recovery Toolbox recovers passwords in Microsoft Office document with different types of encryption. Its consists of a simple and intuitive user interface. After installing of the software, you need simply open a document with protected settings and click "Recover Password" button. In 5-15 min., you will have access to valuable information and can work on it. Important! Do not try to recover passwords in a protected Excel file or other Microsoft Office documents that are encrypted with "strong encryption methods". These encryption methods prevent our program to open your file. All we can do is to recover passwords in unprotected documents 3 important advantages of Office Password Recovery Toolbox: Fast password recovery. Assistance of Microsoft experts Quality service and support.
