Keyboard Macro allows you to add macro commands to your Mac computer keyboard, which can be used to perform repeat tasks. Just assign your desired commands to the keyboard shortcut keys. It works with any Mac application. From now on, you can always open your creative files without the need to switch your applications. You can save time and gain comfort with this highly-customizable keystrokes manager. Keyboard macros use the keyboard's modifier keys (Shift, Control, and Alt) to trigger actions. Pros: It works with every Mac application out there There's no need to learn a new keyboard shortcut, it's already there You don't have to go through several complex steps to get started Keyboard macros are fully customizable It provides you with instant access to your creative files, wherever you are Keyboard macros are designed to save your time and provide ease-of-use. With Keyboard Macros, you can easily add custom keyboard commands for your Mac computer. It allows you to assign your desired commands to the keyboard shortcut keys. Keyboard macros use the keyboard's modifier keys (Shift, Control, and Alt) to trigger actions. In addition, you can use modifier key shortcuts for volume, brightness, and other system settings in all applications. Every feature of Keyboard Macros is fully customizable. You can use it in any way you want, whether you're using one application or a group of them. Once you're set with your initial customizations, you can change the keyboard macro to any other command you might need or want to use in the future. Pros: It's easy to use, you can manage all your commands in one place It works in every application out there, Mac or Windows You can even use modifier keys for functions other than window management It's easy to create custom keyboard macros There's no need to learn new keyboard shortcuts, they're already there You don't have to go through several complex steps to get started You can configure your keyboard macros, and later change them as you wish Keyboard macros are designed to save your time and provide ease-of-use. When it comes to creating a keystroke manager, Keyboard Macros is considered one of the best Mac applications on the market. Designed as a Universal Application, it works in any Mac application. This means you can use it in many creative environments, and even within the same application. 77a5ca646e
