We're excited to share how FIFA 22 gameplay will be enhanced by our revolutionary new motion capture technology and will take the series into a new dimension of reality. We have worked with some of the world's top football stars and we're excited to see how the technology will be used in FIFA 22! To see the Motion Captured Players play, check out our video with Madrid's Luka Modric and Manchester United's Marcus Rashford. Here are just a few of the incredible new features included with Motion Capture technology in FIFA 22: Player Animation: Every player movement and rotation has been reworked based on the new motion capture technology. This means players will perform with increased control and enhanced animation for a more lifelike experience. Body Physic Mesh: Players have a new breathing system; each player's head, neck, torso, and legs are now distinct, as well as the different parts of their body. The physics-based engine allows you to see and feel the physicality of your players as the simulation reacts to match demands and changes in momentum. More than just a game of football, FIFA is a lifestyle. The FIFA franchise is one of the most popular sports franchises in the world with over 220 million players, so our aim has always been to create the best football game in the world. FIFA on iOS The game has quickly become available on the App Store since its official launch in 2013, with FIFA Mobile quickly following. The latest version of the game is now available for iPhone, iPod touch and iPad for \$6.99. You can download FIFA for free at the Apple App Store if you are a registered FIFA Mobile Club member. FIFA on Android We've been working on FIFA on Android for a little while, but still think it's the best football game you can have on your device. The game has been available for Android devices since November 2014, and is in its fourth generation now. From this comes all the improvements you've come to expect from a new FIFA game, and we're continuously making FIFA better on Android. FIFA on PS4 and PS3 FIFA has been one of Sony's preferred franchises for a long time, and is second only to Naughty Dog's Uncharted series on PlayStation consoles. We've spent a lot of time bringing the game to the PS4 and PS3, and recently released the FIFA PlayStation app for PS Vita. FIFA for Web and PC Since the iOS and Android versions, many have started playing the game online using browsers on their computers or mobile devices. Last year saw the launch of the FIFA Ultimate Team, which has been steadily growing in popularity and helped the game to achieve a wider reach. Play Modes The core game, which can be played against friends in local and online multiplayer matches with up to 32 players. Championship Season In Championship Season mode, you take control of one of the 32 teams and try to win the World Club Championship. The standard set of player attributes, kits and ball physics make playing in this game great, and we're always trying to improve the experience for you. Showdown & Scrum The new-for-FIFA-22 Showdown & Scrum mode is a local and online multiplayer format where you can compete in knockout matches and free-for-all games. This mode is set up in much the same way as the old classic FIFA, but now you can re-create famous matches from the FIFA World Cup bc9d6d6daa
