FIFA's own Lead FIFA Engineer, Carl Hansen, has worked closely with the development team to ensure that the new HyperMotion Technology, and other fundamental new features, make a true difference to the way you experience FIFA. Avengers' Training Mode FIFA 22 marks the return of the Training Mode, the first game mode to be fully playable in-engine. Coach your team through a set of 11 different training sessions for beginners and more experienced players. Real-life gameplay including systems like pressure and weight distribution are all recreated. Defy Ball Physics The update also introduces a new physics model for the ball. This means players are able to retain their true natural movement of the ball and attack moves now feel more authentic. Unlock Your Soccer Skills To make it easier to become a better player, we have enabled improved difficulty settings. Beginners can now play on the most basic settings, while harder settings are for advanced players. "The new Training Mode is a vital part of the training experience, so we worked hard to build it from the ground up to create a football simulation that gets closer to real-life football training than ever before," says Tobias Gleissner, FIFA Lead Producer. "Through the addition of "Defy Ball Physics," we've also created the best possible ball movement for an improved in-game experience." FIFA Ultimate Team Ultimate Team has been redesigned to give players the most robust and extensive management tools for FIFA players on-pitch. Now players can store up to 450 in-game cards, as well as those they've previously purchased and unlocked. As well as using the new in-game methods for card unlocking, Ultimate Team has also been expanded with Clubs, Leagues and many card packs. In-game card prices and ticket allocations have been adjusted. If you've previously purchased a specific card from FUT, you will no longer have any restrictions on when you can pick it up again. Also, the cards you unlock from the main game will not count towards your card total, making things even more flexible than ever. The 50 most popular cards have also been given to your account to help you build your Ultimate Team. Players can also earn FIFA Points that can be used to purchase additional FIFA Points cards. I am very pleased and happy with FIFA, but after I decided to take the plunge and buy my first game on the Wii U, I realized that I should have bought the game a year ago. I feel like I wasted my money. It's literally a game, it doesn't change between seasons like every sports game has to. It's basic, and easy, and the controls just work. I'm glad I got it for \$59.99 but I wish I could return it or get a refund. It's a pretty terrible waste of money. I'm a die-hard football fan and I've played almost every version of the game there is - FIFA soccer games have been some of the most enjoyable times I've had with friends. The Wii U version of the game has been incredibly disappointing. There are a few games that I can just turn the game off and forget about because it is simply unplayable. The Touch Screen controls are too sensitive and the graphics are unimpressive. Trying to pass the ball or dribble is impossible to do when you can't use your own body as a weapon. If you've never played the game before or you are a hardcore soccer fan, you would think this was a good game, but if you
