In addition to a series of moves and techniques, players will now have faster reactions thanks to improved “skeletal inertia,” which emulates the properties of a human body’s joints and bones and renders a player’s change of direction more realistic. Respawns Improvements have also been made to in-game opponent behavior – which enables you to gauge when your opponent is about to lose possession. FIFA Soccer 22 introduces new AI player movements as well as more fluid in-game player animations. All these new features enable players to gain an edge on the pitch. Your New Best Friend Artemis – a unique AI-driven football player, who will follow your instructions and help you win the game. Intercept and complete passes with greater accuracy. Bounce the ball exactly where you want it to. Unlock your potential in the most realistic game engine to date. Revamped Stadium and Player AI The Stadium AI has been upgraded, with each stadium now featuring its own unique characteristics. Attackers face different defensive tactics at different ends of the pitch, and defenders will communicate via the control panel, the new Goal Control system, and other important tools. On the pitch, AI players will follow your instructions to the letter and will be well aware of their opponents. This will enable you to influence the match in many different ways. Team Balance Battleground Choose your authentic location of play in over 10,000 square kilometers of immersive sandbox gameplay. Build a team of up to 20 real players in the market and take them into battle on the pitch. 22 Different Ways to Play Customization is the new key. FIFA Soccer 22 introduces a major new customization feature – Custom Formation. The most realistic and authentic football experience to date lets you become the best player in the world. Choose the way that suits you. Powered by Frostbite Using the power of Frostbite, EA SPORTS FIFA 22 will be powered by a real-time, physics-based simulation engine on PC and Xbox One. The engine will be the core of the game’s next-gen graphics and will be the foundation for Frostbite’s previously announced next-generation engine EA SPORTS ANIMATION 2.0.
