Some offer a lighter and stiffer monocoque bodyframe for the same amount of unsprung weight as the Toyota AE86 supercar.. The car has lots of power. Cheap fast handling with almost no body roll.. With suspension alone the Toyota does 0-60mph in 5.2 seconds and hits the quarter mile in 13.8 seconds.. You really can't deny that this car has a lot of potential. I would love to hear what others think about this vehicle. Will it be my next Japanese car. Do you think this is an un-sellable junky on the used car market.
