The most difficult part of applying basic edits to photographs is getting that first image looking good. Photographers should start here to get their photos on the right track. For professional shots, you can start on the next page. Mastering Your First Image The first step in becoming a Photoshop guru is to become comfortable with basic retouching. You need to be able to quickly and easily create the look you're going for without spending too much time on an edit. You can't change something and expect that it'll look better when you open the image. The first image in this section is of a girl in a swimming suit on a beige wall. Her eyes had to be changed, the white of the suit needs to be removed, and the red eye was created. You can skip the next three steps because they're all about creating images, not making them look more pretty. Starting with the background For this particular shot, the background is not as important as how the subject looks. I recommend using the Background Eraser tool, shown in Figure 3-1, to remove the background, and then use the Clone Stamp tool to create a soft edge on her eyes. (You can't create the clone-stamp effect if you choose Soft Light or Hard Light.) If you want to create a hard edge, use the Magic Wand, shown in Figure 3-2, to select her face. You can use the Airbrush tool to create the red eye and even change the color. \*\*Figure 3-1:\*\* The Background Eraser tool allows you to quickly remove unwanted backgrounds from an image. \*\*Figure 3-2:\*\* The Magic Wand tool is a useful means of selecting, isolating, and altering an object in an image. Creating the girl's eyes The girl's eyes are dark brown and a little cloudy. To lighten her eyes, use the original eyes as a guide. After you select the eyes, use the Magic Wand tool to select the areas of skin that you want to lighten (Figure 3-3). \*\*Figure 3-3:\*\* With the Magic Wand tool, you can select a color area that you want to lighten or darken. Keep the brush size small when lightening an eye, or the changes will be too extreme. I placed a little dot of a light blue color on the eye near the center of the pupil. You may have to experiment with colors

You can use Elements to resize your images, crop them, adjust colors, adjust shadows and highlights, and produce high-quality images. The names of all Photoshop Elements features are available on every element pack. In this guide, we will show you the most useful image editing features that are available in Photoshop Elements. The complete list of Photoshop Elements features is available in the official documentation of Photoshop Elements. We will only cover the features that are relevant to image editors, graphic designers and web designers. The following topics are covered: Resizing and Cropping An image is usually displayed on a device with a fixed aspect ratio. It's not just the width and height ratio, it's the aspect ratio. This is the relationship between the width and the height of an image. A rectangle that is twice as wide as it is tall is the square or 4:3 aspect ratio. To be able to resize an image, you must first resize the overall aspect ratio of the image. In Photoshop you can choose to keep an aspect ratio that doesn't correspond to that of the screen where you want to display the image. But you can also change the size of the overall aspect ratio of the image, so it will correspond to the screen. The only way to make an image look like this is through resizing. There are several methods to change the aspect ratio: Change the height and width of the image, then choose "Keep Aspect". Choose "Stretch to Fit", then resize the height of the image

---

only. Resize both the height and width. The relationship between the width and height is kept by the “Keep Aspect” option. Select “Resize” from the menu. Choose “Apply Scale”. Choose “Apply Center”. When you use the “Center” option, the image is resized so that it maintains its center, regardless of where you are currently dragging on the image. Use the “Horizontal Center” and “Vertical Center” options to have the image horizontally and vertically centered in the monitor. When you have your image in the right dimensions, click on the “Crop” button on the toolbar. The crop tool is similar to the selection tool in traditional graphics editing software. It lets 05a79cecff

ST. LOUIS – Right before the St. Louis Blues players took the ice for the first time at Scottrade Center in preparation for Game 1 of the Western Conference Final on Monday night against the Boston Bruins, Blues general manager Doug Armstrong came out to the ice and addressed the crowd. What he said – as reported by the St. Louis Post-Dispatch, but that Blues players apparently weren't told ahead of time – was that a shift in the series was imminent and that the Blues were not going to be bullied. "Now that everybody knows, let's play some hockey," Armstrong said. Of course, what that meant was a new series. Not something just fiercer. Not something with new rules. Not a Game 7 or something. The Blues were basically eliminated from the playoffs on Saturday night, falling to the Blues-bragging-they-beat-up-the-Blues-and-then-ruined-the-Celtics in Game 6. And this series? This series has been out of control since Game 1. There have been too many physical brawls. There have been ugly dirty moments in every game. There has been a total lack of respect for each other and the referees. There have been a few teams that would know a little about pushing a button or two in a bigger market. There has been a huge amount of public booing of the opposing teams, referees and even coaches. I'm not saying it's been as bad as the NBA's idiotic Game 6 series between the Dallas Mavericks and the Oklahoma City Thunder, but it's been a complete embarrassment for the National Hockey League. Think about it: The NHL has been without the "Cup of Steel," a tradition that has been stopped for 40 years, and they still can't seem to figure out how to control the series. Instead of one team having a chance to kill off a series and force a Game 7, it's now a best-of-seven series with the other team essentially eliminating themselves in the process. To make matters worse, this season's playoffs has had a list of high-profile injury crises. One of the most dominant players in the game, Washington Capitals forward Nicklas Backstrom, was done for the season with a knee injury. Top goalie Henrik Lundqvist was hurt as well. You've got Ottawa Senators' defenseman Chris Phillips being suspended. You've got Anaheim's defenseman Cam Fowler being suspended

## What's New In?

Turning 30 30.01.2013 It's no longer just a new year for me, it's now a month away from the big 3-0. I'm approaching my thirties with a sense of dread, trying to think of all the things I'm not doing. And I feel it's been a bit of a long time since I've been free of the weight of the middle-years. I have some great memories of my twenties, but I also have some that look a lot like regrets – or just plain old guilt. I've done some things I can't easily undo, and I've enjoyed things I can't seem to repeat. I've never had a particular plan when I hit the thirties – for most of my life it's just been more or less a case of "when I get there, I'll fix it", and I've managed to get by pretty darn good. But it's not as though there were a lot of fun things lined up as I got older...or even much that felt like it was going to bring happiness. And, most of all, I'm scared of turning 30. 30 is an arbitrary number, and I don't want to be forced to go by it. But I also don't want to waste another decade of life. It's not an easy thing to admit, even to myself, that I'm growing up and moving on... The thirties are coming fast (it's tomorrow!) and I have to say I am a bit nervous. I have a great boyfriend, a good job, a beautiful house, and loads of friends. So, I guess I still do have something to be happy about. I think I've spent my life thinking of my twenties as a punishment for something – for something that happened at 16, something that was in my past. But it's not like I have a trust fund to fall back on. I've never had time for going out or making plans or having parties, and the only happy memories from my 20s are all about my family. This is my life now, and this is what I've made of it. There may be more to
