FIREworks While Photoshop and GIMP offer all the professional editing tools that you might need, Fireworks has a much simpler, more streamlined approach. It's all about speed, rather than power. Fireworks is an image editing program for Mac OS, which allows you to create very complex web graphics. For example, you can use images for pages on a website, and then add various options, including text, photos, and so on. Fireworks is a popular and highly supported software for Mac and Windows, and it's available at various prices. You can also find tutorials, training options, and more through Google, or try free trials available. If you are looking for a more simplistic web design program, Fireworks is worth a look.
