The two most popular image-manipulation programs are Photoshop and Corel's PaintShop Pro. Some photogs and designers prefer to work with only one, while others use the two to complement each other's features. The key to using Photoshop as a tool for professionals is training. You must keep current with new releases, so you're able to use the most recent version. You also need to know how to work with Photoshop's layers. PaintShop Pro is much cheaper than Photoshop, but no one should use PaintShop Pro for a serious editing job. Although you can edit a photo in PaintShop Pro, you have fewer choices, including only basic adjustments, and you have to deal with some irritating interface quirks. Q: Excel save as PDF not working in Office 2010 I'm trying to save a file from Excel 2007 as a PDF, but I'm getting the following error: "Error Number: -2147467259 (8001010D)An exception occurred processing the form..." My code is: private void Document_PrintPage(object sender, PrintPageEventArgs e) { MemoryStream memoryStream = new MemoryStream(); e.Graphics.DrawString("Hello World!", new Font("Tahoma", 12, FontStyle.Regular), Brushes.Black, new Point(20, 20)); e.Graphics.DrawString("Could not save file.", new Font("Tahoma", 9, FontStyle.Regular), Brushes.Black, new Point(20, 70)); e.Graphics.DrawString("Press OK to finish.", new Font("Tahoma", 9, FontStyle.Regular), Brushes.Black, new Point(20, 130)); e.HasMorePages = false; e.HasMorePages = true; if (e.HasMorePages) { e.HasMorePages = false; // Save the document as PDF file. DocumentPdf test = new DocumentPdf("Users/Desktop/test.pdf"); test.Save(); } } Is this a problem with my code or with Office 2010? A: You should be able to open the document as a file to get around the errors. For example, you could open the pdf as a file and then save it as an excel document, or save the file as an excel document with the pdf embedded in the document as opposed to a linked file. Q: ObservableCollection.Empty cant reset ICollectionView I have a ObservableCollection with a ListBox. And I need to clear the ListBox when the user selects an item. I have a ComboBox with SelectedIndexChanged="ComboBox_SelectedIndexChanged" private void ComboBox_SelectedIndexChanged(object sender, EventArgs e) { SelectIndex = Convert.ToInt32(ComboBox.SelectedItem); NotificationsCollection.Clear(); NotificationsCollection.Refresh(); NotificationsListBox.Items.Clear(); NotificationsListBox.Items.Refresh(); NotificationsCollection.Add(new Notification("test", "test")); } In this case, the collection is empty, but I have a ListBox with items added before clearing. A: Clear() is an operation on the collection; it doesn't clear the items in the list box. Use NotificationsCollection.ToList().Clear(); instead. The ToList() call forces an enumeration of the collection. Takanohara Castle was a Yonezawa Domain castle located in Yonezawa, Tōtōmi Province, Japan.
