Pillars of Salt (1994) Fadia Faqir PDF, ePub, txt, rtf .Q. Error: Uncaught Invariant Violation I'm using React-Native to build a simple app to display a list of recipes. It works pretty much as expected and I've added a search function to try and figure out what's wrong. I have a function call getRecipeData(search) which passes my search query to a method which fetches the data from the remote API. The API call is returning the data but when I try and call the function I get this error: Warning: Invariant Violation: getRecipeData(...): Invalid argument: You must pass a string as the second parameter. in Component (created by RecipeView) in RecipeView (created by NavigationContainer) in NavigationContainer in RCTView (at RecipesPage.js:45) in RCTView (at App.js:90) in App I'm unsure what the problem is and would really appreciate some help! Here's my code import React from 'react'; import { StyleSheet, Text, View, Animated, Image, Dimensions } from 'react-native'; import { createAppContainer } from 'react-navigation'; import SearchScreen
