Many people have been satisfied with our services. 1. Field of the Invention This invention pertains to window blinds, in particular those made by means of a continuous loop of flexible cords as opposed to a series of loosely tied knots, and more particularly to a method of and a machine for cutting the cords are suspended in a longitudinal channel formed of two longitudinal edges and two transverse sides, and the blind is made by merely pulling the cords upwardly so that the edge portions are allowed to overlap to form a series of loose knots. The knots are then given a tendency to elongate by twisting them at intervals. Thus, a lengthwise strand of the cord is pulled through the channel along
