The Elliptical Marquee provides a quick means of selecting an image element (such as an object, a part of the image, a face) and surrounding it with the selection tool to create a new element. The Liquify filter lets you create an initial "shape" from which you can produce other effects. These include distorting the shape of the image, rescaling it, or moving or warping it in any direction. And the Pen tool lets you draw or paint directly on the canvas, adjust the tool settings, and make selections using the Brush or other tools. There are literally thousands of tools and features in Photoshop. Here are a few useful and popular ones: Brushes A brush provides a set of preselected pixels that you can use to apply an effect (such as a color or a blur) to an image. Some of the most common brushes include the: Bucket of water - This brush creates a droplet effect. Hold down the control key (or Shift) and click to create a drop-like shape. When you click again, the droplet spreads over the canvas. To change the color of the water, click the left or right side of the bucket. The Blob brush creates a virtual blob on the canvas. Try painting a white circle and then painting over the middle of the circle with a black color. The Brush tool, which is selected by clicking with the Pen tool and then pressing Ctrl (or the C key), also works like the Bucket of water brush. However, instead of creating a virtual bucket, the Brush tool creates a brush made of pixels. To change the color of the brush, click the left or right side of the brush. Erase - This brush erases an area of the image. Click in an area that you want to erase and then click the Eraser tool. Click on a color swatch to change the color. Or click the Brush tool. After you erase an area with the Erase tool, you can use the Blob tool to quickly fill the hole. For example, click the Blob tool and then click the area of the image that you want to fill. If there is a hole in the image, the blob will fill it. The Paintbrush - This brush can be used with the Brush tool to paint on the image. Pan - This brush lets you move the canvas around. The Rounded Rectangle - This tool creates a rounded rectangle on the image. Try painting
