«Britannia».Patient involvement in information. A new system of patient information was introduced at the Norfolk and Norwich University Hospitals NHS Trust in February 2002. The success of this information was measured by regular patient satisfaction questionnaires and audits. This system was adopted to introduce a new service by which patients were to be given more of an opportunity to have their involvement on an equal basis with medical staff. The authors believe that patient information is essential to enable patients to have the best possible experience of a service, and that a more even and open relationship should be sought. This paper aims to look at the potential problems that can be associated with patient involvement. t q b e ((- 3) / 2) / ((- 1 2) / 5 6) . L e t d = 1 0 - q . W h a t a r e t h e p r i m e f a c t o
