Sebootloaderunlockingrelockingexe - Free Download Karaoke Song Repo - Hello world! (2048) Ukori Vs Lire 10 - sfd - Q: Route parameters order in Yii2 using gii I am using Gii to generate my controller and models. I need to add a route to my controller. Example. My route in my yii.php should look like this \$config = yii\web\ArrayConfig::merge([ 'enableCsrfValidation' => true, 'enableClientValidation' => true, ]); \$router = Yii::createObject(ArrayHelper::merge(['id' => 'home', 'label' => 'Home', ], \$config)); \$router->class = 'HomeController'; \$router->defaultAction = 'index'; I use it like that in my ApplicationController when i call it from my HomeController public function actions() { return [ 'home' => [ 'class' => 'HomeController', ], ]; } but i need to know if i have a parameter in my route, i mean i don't wanna have to have a parameter in my route always. example: return [ 'home' => [
