The formulation, processing, and thermal stability of the polymers used in sol-gel processes is critical to the success of the resulting coating. Optimization of the polymer is thus an important factor in obtaining an appropriate coating or mold that meets the demands of the substrate. Many known self-nucleating polymers have been described in the literature, which generally contain alternating units of anionic monomers (e.g., acrylamide). However, these have had limited use in coating or molding due to their lack of thermal stability. Milan and the Blues Milan and the Blues is a live album by blues musician Taj Mahal.
