Roblox is a user-generated, free online multiplayer software platform and game creation system which allows users to program games and play games created by other users. It was founded by American business and development students David Baszucki and Erik Cassel. Its first-person platform was developed on the Unity game engine. Roblox was released publicly in September 2006 and is available for Microsoft Windows, Mac OS X, Linux, Android, the iPad, and the PlayStation 3. Most of Roblox's games revolve around the idea of "role playing". The platform is described as "Minecraft in a browser" by its creators. Its games are largely text-based, but Roblox and its developers have tried to minimize this drawback by including a simple graphical interface for drawing objects. Roblox was one of the first massively multiplayer online role-playing games to be developed. The games are controlled through a player's webcam, controller, or touchscreen and are meant to be an online community in which players can visit the world of their friends and share their creations with them. Roblox is free to use, and has no in-game advertising, however it does have optional premium content. This content includes additional clothing, furniture, and robots for use in games. Roblox has a virtual currency called Robux. It can be used to purchase the premium content, or gained as a bonus for creating and playing games. The virtual currency can be earned through in-game activities, referred to as "dough". The Roblox Kids app is available for use on iOS devices, such as Apple smartphones and tablets. It is designed for children in the 5 to 11 age range, and functions as a simplified, child-friendly version of Roblox. The app is free to download and use, and does not contain any in-app purchases. Target Audience The platform is primarily meant for children, but many adults play as well. Roblox's games tend to be aimed at the 7 to 14 age group, and Roblox wants children to be able to come to Roblox with their parents. Through in-game tutorial graphics, Roblox and its developers try to guide children along to create their own Roblox games. Parental controls are available on the website to help regulate content and protect children from predatory behavior. Development History Creation and Release Roblox was created

Stratagems To get a free Roblox subscription you will have to play games and become a member of a clan. The higher the difficulty of a game, the more points that you'll get. Note: Some of these stratagems have been updated in Patch 1.6, thus they may or may not work. Also most of them are pretty useless for Free Robux. Renewing a Roblox membership with a battle pass. General: Look for available RS codes from games on the right side panel, there are a lot. Make sure you have enough robux. This technique requires a Roblox account, a robux glitch and an active internet connection. To do this go to the Roblox website and sign up with an email and password. After your first game you'll find 5 Battle Passes, there's nothing special here. You'll have to have a Super Boost in your inventory to extend it (See more »). You'll unlock one battle pass as soon as you bought a Robux Dollar. You need a 1500 Robux minimum to extend the rewards. You can extend the battle pass even more for another 300 points, if you have an extra Robux Dollar. When you click on the battle pass, the robux you have in your inventory will be replaced by the one from the battle pass. Purchase a set amount of Robux, 15 for 100 Robux. The amount is suggested when you purchase the Robux. You can purchase the battle pass up to 35 times. If you increase the robux amount, the amount of points will go down. Credits: How often you get a robux when extending the battle pass will depend on how often you purchase credits from the website. When purchasing credits, keep in mind that credits expire after 7 days. If you want to extend the battle pass with a larger amount, it may be worth purchasing many different times. Premium progression This stratagem is recommended for people who want to get free robux. Note: The robux glitch is generally not recommended for gamers since the amount of robux that you receive doesn't compensate the time you had to spend. Also the robux glitch is not recommended for cheaters. Complete all levels with the normal mode or within the first three minutes with the expert mode
