
Total.War.Saga.Thrones.of.Britannia-VOKSI Game Hack ^NEW^

The CRack Team and CPY a.k.a. Ukhasifah, a versatile cracker extraordinaire, on August 21st of 2018 released tools which can be used to bypass Denuvo v4 on Spyro Reignited Trilogy and Spyro & The Lost Vikings . Shadow of the Colossus was also released with tools allowing for Denuvo v4 to be bypassed. Unlike other Denuvo v4 crackers, Ukhasifah and the CRack Team were very upfront about the fact that they are releasing these tools to bypass Denuvo. Denuvo first reached the scene in 2011, and since then has become the biggest protection for games. Among the commercial games that have used it, there are also small indie games and older game titles that are still being developed. Spyro Reignited Trilogy and Shadow of the Colossus took advantage of this, and were released in early 2019 with a Denuvo v4 license. It must be noted that both of these games use an older version of Denuvo, as Denuvo v4 was only released in September 2018. Denuvo v4 protects against known issues, which may help it increase in popularity. Denuvo v4 has also brought up many results in online traffic in contrast to other versions of the anti-tamper tech, which makes it a favorite amongst crackers. Denuvo v4 was also the first version that brought a high number of bugs in online traffic and, specifically in Denuvo protected games. The registration amount for Denuvo v4 is 28,95,000,000 from an initial registration of 14,45,000,000. Also, no new games are protected using Denuvo v4. So as of now, Denuvo v4 is the most popular protection for games among crackers and fair players. It seems that Denuvo is still a favored anti-tamper tech for game developers as for fair players. Some protection and anti-tamper cracks may cause some users to not recognize the detection or CPU crack. However, it will be of great help to those who have trouble with Denuvo. Now let's move on to the tool released by the CRack Team and CPY a.k.a. Ukhasifah, a versatile cracker extraordinaire, on August 21st of 2018.
